

## Sustainable Building

In Fall 2006, West Linn City Council adopted the Sustainable West Linn Strategic Plan and established a Sustainability Advisory Board in 2007 to oversee the plan's implementation. Sustainable West Linn is about how we can thrive as socially vibrant, environmentally healthy and economically viable community in ways that protect our natural resources for future generations. It is a process that requires governments, residents, and businesses to rethink how we do things and take advantage of new findings and tools.

Read more about the Strategic Plan and how this building project will be a showcase of this "green" practice.
